

Clinical Patient Management Exam – Orthotics

Tools & Supplies

All candidates will be required to utilize the supplies and tools provided by ABC to measure and take an impression for a thermoplastic Ankle Foot Orthosis for an adult patient model. **Do not bring your own tools.** The **only** item(s) you will need to bring are writing materials (pens and pencils).

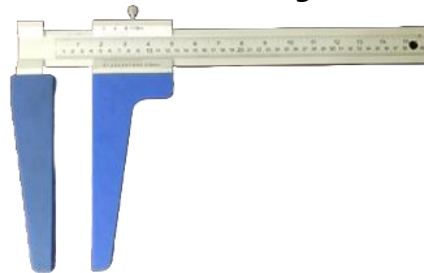

ABC will provide the tools and supplies necessary for the exam, including the supplies required to:

- Measure and take an impression for a thermoplastic Ankle Foot Orthosis for a patient model (Note: the impression will not be filled so a thin cast is recommended)
- Assess and measure for a spinal orthosis for a patient model
- Assess a finished KAFO prior to final fitting based on the measurement form

Angled shears, EZ cutter OR an oscillating cast saw will be available for cast removal (see images below). The tools and supplies that will be available also include the following:

- Cast/bandage scissors
- ProCast 3" and 4" synthetic casting tape
- Indelible pencil
- Tape measure
- ML gauge
- Goniometer
- Cotton stockinette (3" and 4")
- Exam Gloves

Exam ML Gauge

Angled Shears

EZ Cutter

Cut Strip

OR

Oscillating Cast Saw

Cut Off Surgical Tube

We recommend that you familiarize yourself with the tools and supplies listed above as you will not be able to use your own tools and supplies.
