

What is a career in

POP

PROSTHETICS
ORTHOTICS
PEDORTHICS

POP professionals, or people who work with prosthetics, orthotics, and pedorthics, help people move better.

- Through custom designs and fittings, POP professionals adapt devices such as braces, artificial limbs, and footwear to meet the individual needs and goals of patients who are experiencing mobility challenges or are recovering from disease, injuries, or accidents.

POP professionals change lives.

- Prosthetic, orthotic, and pedorthic professionals positively affect patients, their families, and communities.
- POP professionals build close connections with patients that are personal and meaningful.

POP jobs are challenging and fun.

- No day is the same – POP careers combine healthcare with engineering, technology, creativity, and science to build a well-rounded and rewarding profession.
- POP professionals work to solve problems that help others.
